

Ronnoco is your trusted cross-Canada distributor of premium fluid dispensing systems and accessories. Serving the automotive, agricultural and marine sectors, as well as fleet and industrial markets, we offer customized, cost-effective solutions to maximize performance and improve your bottom line. From parts and pricing to installation and service, count on us to surpass your expectations.

Your one-stop shop for DEF equipment and supplies

We supply, install and service Tecalemit DEF dispensing systems and accessories. This internationally-recognized brand is well known for its legendary German engineering and reliability. Tecalemit's DEF products are the highest quality available on today's market.

Hornet W85 DEF pump Best in class

This is the world's first self-priming hybrid pump and the fastest, most efficient DEF pump on the market today. This Tecalemit pump is rugged, easy to use and self-primes in less than five seconds.

Features:

- Made in Germany
- 20% higher flow rate than other pumps on the market
- Includes digital display meter and 20-foot outlet hose
- Automatic stainless steel nozzle
- Capable of handling large tank configurations
- Suitable for fuel island dispensing
- Can be integrated with existing storage systems

All-in-One Northern DEF package Plug and play

This is Tecalemit's complete, drop-in DEF storage and dispensing system. It comes fully assembled and customized for your particular needs. All you have to do is fill the tank, plug it in and turn it on.

Features:

- Insulated storage tank (500 to 3,000 gallon sizes)
- Fully functional in Canadian sub-zero temperatures, indoors or out
- Includes the Hornet W85 hybrid pump
- Complete with flow meter, automatic nozzle, and 15-foot delivery hose, mounted in a lockable cabinet
- Can be upgraded to integrate with your current management system

Non-insulated packages suitable for heated indoor use are also available.

Superbox

The master fluid manager

Tecalemit's top-of-the line fluid management system is compact, easy to use and capable of controlling up to 5 fluids going to 5 different outlets. It tracks every transaction for up to 2,000 users, making it easier to prevent inventory losses and evaluate operations from a variety of angles.

Features:

- Made in Germany
- Handles any fluid with proper pulse meter
- Stores up to 10,000 transactions
- Users can be tracked by user ID, odometer, time intervals
- Standard PIN code access
- Security ensured with driver ID, vehicle ID, key fob
- Easy data export via USB, Ethernet LAN or Wi-Fi to MS Excel/Word
- Measures tank levels and capable of printing receipts

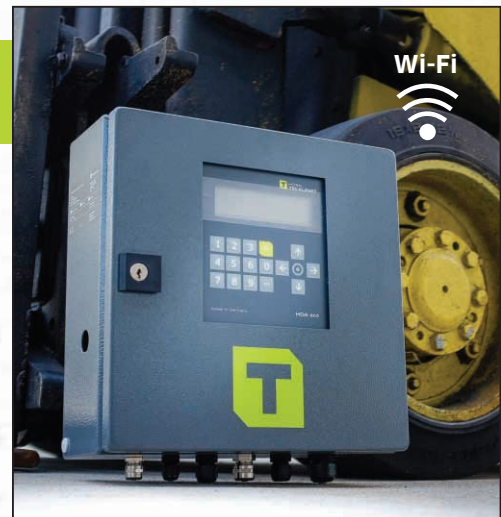

Wonderbox

Get a handle on inventory

This premium fluid management system is similar to the Superbox, except it's a single-hose dispensing unit. It too is compact, simple to use and tracks transactions for up to 2,000 users. The Wonderbox is also capable of providing the kind of information you need to prevent inventory losses and evaluate usage.

Features:

- Made in Germany
- Handles any fluid with proper pulse meter
- Stores up to 10,000 transactions
- Users can be tracked by user ID, odometer, time intervals
- Standard PIN code access
- Security ensured with driver ID, vehicle ID, key fob
- Easy data export via USB, Ethernet LAN or Wi-Fi to MS Excel/Word
- Measures tank levels and capable of printing receipts
